Assignment 2 Introduction

NMDE Elements II
September 8, 2014

Instructor: Hye-Jin Nae
Email: hxnfaa@rit.edu

Assignment Creative Thinking Exercise - Beauty Definition Visualization

Steps

1. Finish “Beauty is _____ .“ It can be sentence or words.

2. Look for **inspirations**. Create **brainstorming notes**, **concept /composition sketches** and find images as needed. (You must incorporate your definition text with your imagery harmoniously). Type can be used as imagery as well.

3. Start to design on the computer. Choose your software (e.g. manipulate the image using Photoshop and Illustrator to compose design). Based on your concept create the appropriate imagery and type (type can also be a part of imagery!).

4. Ask yourself “Does everything relate harmoniously to everything else?"

5. If your answer is YES then upload your PNG file **“beauty.png"** to mycourses **“Assignment 1 - beauty is"** folder. You also upload your found original image files as “original1.jpg, original2.jpg…"

Requirements

- Design Output: 7" X 9" (vertical or horizontal)
- Your definition must be in your design solution.
- You CANNOT directly apply the found images to your design; you must manipulate the images to carry your concept. If you are using non manipulated images then it must be yours.
- You have been given an assignment 2 document template on mycourses. You are to download the InDesign file and edit accordingly by “filling in the sections".
- Export the edited template document as “pdf" file named **“Assignment2.pdf"**. Don't forget to optimize your PDF file.

Due

- Assignment 2 - PDF document **due by the end of week 3 lab**.
- Assignment 2 - Final visualization completion **due by the end of week 4 lab**.
